

## Introduction to Agriculture, Food, and Natural Resources Course Description

*Introduction to Agriculture, Food, and Natural Resources* (AFNR) introduces students to the range of agricultural opportunities and the pathways of study they may pursue. CASE incorporates science, mathematics, reading, and writing components into the context of agriculture. Students use this course's introductory skills and knowledge throughout the CASE curriculum.

Woven throughout the course are activities to develop and improve students' employability skills through practical applications. Students explore career and post-secondary opportunities in each area of the course.

While surveying the opportunities available in agriculture and natural resources, students learn to solve problems, research, analyze data, work in teams, and take responsibility for their work, actions, and learning. Students investigate, experiment, and learn about documenting a project, solving problems, and communicating their solutions to their peers and members of the professional community.
